

2027 Position Description Form

Position: Northwoods Ecology Intern

Location: North American Bear Center → 1926 Hwy 169 Ely, MN, 55731

Hours: 40+ hours a week. This includes weekends and holidays

Stipend: \$1500 at completion of internship. Off-site housing is included (with all amenities)

Responsibilities:

- Assist in captive small animal care by: feeding and food preparation, maintaining a feeding schedule and following diet guidelines, enclosure maintenance, providing enrichment, handling, and guest interaction
- Engage our guests in conversation, answer questions, and help direct them to info and exhibits within the NABC museum
- Assist in programming for our guests in a professional manner with programs and online live broadcasts
- Continued learning of all educational information provided by the NABC and staff
- Completion of an independent intern project
- Other duties as assigned

Benefits:

- Minnesota small animal biology and other educational outdoors information shared by a team of professionals
- Free entry to the North American Bear Center after completion of the internship
- Discounts in the Bear Necessities Gift Store
- Bikes provided by the NABC for transportation to the Center and around town
- Close proximity to the Boundary Waters Canoe Area Wilderness and Superior National Forest

Qualifications:

- Currently enrolled (or recently graduated) in a college/university pursuing a degree in Natural Resources, Biology, Zoology, Ecology, Animal Behavior, Conservation, or related field. 18+ years of age
- Eagerness to learn about animals and their environments.
- Comfortable with public speaking and communication.
- Comfortable completing duties and living with people of different backgrounds
- Comfortable completing duties outdoors in a variety of conditions and terrain
